CORAM Riser Shower trays

For site conditions, such as solid floors, where the plumbing connections cannot be recessed into the floor, a riser shower tray offers an easier, lower cost alternative to building a plinth. The plumbing connections are concealed beneath the 185mm high tray, which offers easy access via removable panels.

For alcoves Height to rim 185mm

Showertrays with 3 upstands and 1 panel are designed specifically for alcoves. They have a unique watertight front edge to prevent leaks.
